

I am writing in concern of the use of LPFM stations taking priority over the current FM translator service. My radio station "K-LOVE" serves our christian community in various helpful ways and we would NOT desire to lose access to these stations. 94.9 and 94.7. Our community would suffer great loss of the only clear christian station in our area with variety in music that we like to listen to.

I believe the service provided by K-LOVE is of great public interest because so many of us use the station. As you know, K-LOVE is a listener supported station, so that in itself tells you that enough people use it to make it vital to our communities. So please, we ask you respectfully to not interrupt our K-LOVE services with the changing over to this LPFM translator that we have learned about. I speak for my church community and our extended area community when I say: Thank you so much for your consideration in this matter. Jay Sollars
